

Dear Resident,

Over the next week, we will be installing WiFi throughout the residential garage on P1 & P2. During this time, there will be someone working on a ladder downstairs running wires and installing the WiFi repeater system.

**We kindly ask that you take extra precautions while driving through the garage over the next week.**

The purpose of the WiFi in the basement is to provide all of the residents with the ability to make calls over WiFi, whether you are driving into the garage and are already on a call or need to make an emergency call from below.

Once the WiFi is installed, we will send out a note with the login information so that you can put it in your phones and vehicles.

If I can be of any assistance, please feel free to contact me at any time.

- Ryan Figley | General Manager
